Reasons for requesting review:

- For a reference to anticipate a claim, it must disclose each and every element of the claim. See MPEP 2131 and cases cited therein, including *Richardson v. Susuki Motor Co.*
- **In Final Rejection mailed 4/28/2005**, Claims 44-55 were rejected under 35 USC § 102(e) as anticipated by U.S. Patent No. 6,576,351 to Silvernail (Silvernail '351). This is clearly erroneous because Silvernail '351 does not meet all of the limitations set forth in **Claim 44**, the only independent claim presently pending. (See Response filed 6/24/05, page 2: lines 3-13.)
- **In Final Rejection mailed 4/28/2005**, *Fig. 6 of Silvernail '351* was cited by the Examiner (See Final Rejection mailed 4/28/2005, page 2: last full paragraph.)
- **Applicants' Response filed 6/24/05** pointed out shortcomings evident in *Fig. 6 of Silvernail '351* cited by the Examiner, which the Examiner apparently did not appreciate.
 - Silvernail '351 clearly does not meet the following limitation of claim 44: "said high-density layer is disposed over said planarizing layer in a manner such that said high-density layer extends to said substrate layer and, in conjunction with said substrate layer, completely surrounds said planarizing layer" (See Response filed 6/24/05, page 6: *Fig. 6 of Silvernail '351* cited by the Examiner followed by lines 1-9.)
 - Applicants explained, in detail, the difference between *Fig. 6 of Silvernail '351* cited by the Examiner and the present claims (See Response filed 6/24/05, Page 6: lines 10-15.)

• **Examiner's Advisory Action mailed 7/25/2005** states that "Applicants reference to the specification to distinguish the prior art is not persuasive because such conditions are not found in the claim language itself" (See Advisory Action dated 7/25/2005.)

- Applicants did not reference the present specification to distinguish the prior art from the present claims. Rather, Applicants referenced a prior art specification (*Fig. 6 of Silvernail '351 cited by the Examiner*) to distinguish the prior art from the present claims.
- Applicants drew the Examiner's attention to the present specification only at paragraph 0037 which points out the drawbacks of the arrangement shown in the prior art specification (e.g., *Fig. 6 of Silvernail '351 cited by the Examiner*). Specifically, because the planarizing layers disclosed in the arrangement shown in the prior art specification (*Fig. 6 of Silvernail '351 cited by the Examiner*) are not completely surrounded, each presents a path of low resistance to harmful environmental species such as moisture and oxygen. (See Response filed 6/24/05, Page 6: lines 15-18.)
- As pointed out above, Claim 44 positively recites structural limitations that clearly distinguish the present invention over the prior art.
- Reconsideration and withdrawal of the sole remaining rejection in this application, which is clearly erroneous, are requested.
